Change of PRS Date for PCT Applications Entering the British National Phase

The legal events for PCT applications entering the UK national phase (=WO ENP) originally had the date of the published PCT applications as the PRS date.

For all other PCT applications entering a national phase, the PRS date is the date of entry.

From now on, the PRS date for British PCT applications entering the national phase will also be the actual date of entry into the national phase.

Former GB entry data will not be changed.
