

Brief and important information for our users

## Newsflash 2004/18

### **03-06-2005 Resumption of Entry into the National Phase in Kenya**

This is to inform you that from week 23/2005, the PRS database will once again contain KE PCT Entry data from the year 2001 to 2003.

The legal status code for this data is WO ENP

We would like to remind you that since Kenya retains the PCT application number as their national application number, there will be no cross reference between the WO and the KE application number, but just an "ENP" (entry into national phase) record, for those published applications of WO designating Kenya and having fulfilled the requirements set out by the Kenyan patent office for entry into the national phase.
