

Brief and important information for our users

Newsflash 2006/11

10-03-2006 Legal Events from the Supplement to the Australian Official Journal

This is to announce the collection of legal event data of the Australian patent documents with numbers in new format included in the INPADOC PRS database from week 09/2006. The data is retrieved from the Supplement to the Australian Official Journal.

Patent information for AU patents with the new number format YYYYdnnnnn where (d= 1 for innovation patents, d = 2-7 for standard patents, d= 8 for petty patents and d= 9 for provisional applications) is published in the "Supplement to the Australian Official Journal". The first publication of the above mentioned journal was the 28.11.2002.

The PRS Codes remain unchanged.

As data in the previous format has to be collected manually and this data collected electronically, the PRS dates collected in the same week of the data in old and new format will be different. We will try to bring the new data format up-to-date (i.e. data input in INPADOC not later than two week after publication of the journal) during 2006.

Forecast for loading AU data (old format)
