10-03-2006 Delay of Hungarian Legal Status Data

Due to changes made to the data format by The Hungarian Office, a new program has to be implemented to treat the legal status data. As a result of this disruption, there will be a delay in the data input.

This is also to inform you that apart from the amendments in the format, new HU PRS codes are being generated.

The new codes will be announced when we can resume the loading of Hungarian legal status data.
