Newsflash 2006/17

13-04-2006 Missing elements in RU bibliographic data

In order to overcome a delay in the upload of Russian bibliographic data, the recent Russian data collections on CD ROM have been treated and loaded into the EPO bibliographic databases and include publications up to 20.03.2006.

However, not all the data elements are available yet. The IPC8, the transliterated applicant and inventor names and the English titles are missing. We will reload them as soon as they become available.

Please note that the applicant names (tag 973), the inventor names (tag 972) and the titles (tag 954) in Russian language (Cyrillic alphabet) have been incorporated in the IFD data.
