## Newsflash 2006/30

### 21-07-2006 Bibliographic data from Iceland

We are very pleased to announce the inclusion of Icelandic bibliographic data. IS data will be introduced in the database in week 31/2006.

Approximately 13,000 documents from 1924 until June 2006 will be included.

Since some of the documents received contain only the PCT priority, the family links cannot be made at this stage yet.

The availability of the enriched data will be announced in a future newsflash.
