Newsflash 2007/02

28-02-2007 Missing WO Publications

Bibliographic data for about 2500 WO publications is missing in the EPO bibliographic database.

The reason for the delay in the data capture is due mainly to the changes in the delivery format, incomplete data on the original tapes as well some internal problems.

The EPO is working hard to collect all the missing data and it is estimated that the data should be loaded by May 2007.

We apologize for any inconvenience caused to our users.
