

Brief and important information for our users

Newsflash 2007/03

28-02-2007 Delay in the delivery of Spanish data

This is to inform you that due to changes in many of the Spanish kind codes, in particular the codes for utility models (U and Y) as well as amendments to the IPC8 classifications and citations there has been a delay in the loading of ES bibliographic data.

Older data is also being corrected and XML data is not expected before June 2007.

For details of coverage, please check our weekly statistics
http://www.european-patent-office.org/inpadoc/statistics_dwld.htm

Since Spanish data will not be uploaded in *esp@cenet®*, we would advise you to consult the search tools of the Spanish Patent Office for searches of recent ES publications; the web address is

http://www.oepm.es/internet/bases_datos/inven_FatWire.htm

We are sorry for the inconvenience caused due to these delays.
