

Brief and important information for our users

Newsflash 2007/04

08-03-2007 Details of the PRS Backfile delivery

This is to inform you that this week we are sending you supplementary files of backfile data from week 36/2006 to week 39/2006.

These additional files have been added to this week's PRS delivery since the previous backfile (labelled Backfile PRS Database until week 39/2006) actually only contained the data up to week 35/2006.

We plan to produce a new PRS backfile around the beginning of April 2007 and will ensure that the actual data contents match the label on the CD.

We apologize for any inconvenience caused.
