## Newsflash 2006/05

### **23-03-2007 Update on the French abstracts reload**

A big reload of the missing French language abstracts was due to begin in week 46/2006 but unfortunately, the schedule of the upload as announced in Newsflash 2006/45 was delayed due to problems encountered with matching kind codes of the abstracts with the kind codes in DOCDB.

The problems have now been solved and the reload will begin in week 13/2007 and continue until week 16/2007.

Approximately 100 000 updated French records will be added each week.

We apologize for the inconvenience caused by this delay.
