

## **IPG - Newsletter 2000/01**

### Defective correction records in week 52/99

We noticed it only after it had happened: there is quite a lot of incomplete correction records, in particular for US and WO, containing only the abstract data. As abstracts are not displayed in the IPG the information given is completely useless and should be ignored.

In weeks 1/2000 and 2/2000 there were still some records affected, from week 3/2000 onwards we eliminate them before distribution.

Sorry for the inconvenience.
