

## **IPG - Newsletter 2000/02**

### New Romanian (RO) Document type

We have been informed by the Romanian Patent Office to supply an additional document type, namely the “transitory patents”. Our investigation about the nature of this new document kind have not yet been successful, but we will inform you as soon as we receive the information.

The numbering is done by the Romanian Patent Office by appending a “T” to the number, e.g. 2001T, 2002T .....

We will present them without “T”, but with a new kind code “C1”.

C1      transitory patent .

The Romanian Patent Office has also announced to supply us with abstracts in English and Romanian for the granted patents in the future.
