### New Slovenian Patent Numbers

The Slovenian Patent Office has changed the numbering system for the patents from publication date 2000-02-29 onwards.

The new number series starts with number 20001. To avoid conflicts with the former series that had format yynnnnn (in fact a copy of the filing number) we will introduce a new kind code and a new document type (for the microfiche series).

The new kind code will be C, the new type in the microfiche sets will be P2.

SI	A to A8,	Patent number old format yynnnnn, type P
SI	B	Amended claims, old format yynnnnn, type P
SI	C	Patent number from 20001 onwards, format nnnnn, type P2

Some of the new numbers have been entered into the week 38/2000 production with kind code A. We will delete them and replace them with the correct value C within the next weeks.
