Translation of European Patents in Denmark (DK) and Slovenia (SI)

On request of the patent offices of Denmark and Slovenia we have started to include the translations of European Patents into the bibliographic file. In Denmark translations are done if DK is a designated state and in Slovenia if SI is an extension state.

For the Danish translations the title is given in Danish language and for the Slovenian translations in English language (as it is done for the national applications of said countries.)

The European Publication number is preserved, the publication date is the date of the publication of the translation. DK starts with publication date 910923, SI with publication date 971031.

DK - T3 : Translation of an EP patent into Danish

SI - T1 : Translation of the claims of an EP patent into Slovenian.

Enclosure in INPADOC starts with week 98/33.
