

## IPG - Newsletter 99/10

### Translation of PCT application into Chinese language

From 1998 onwards, the Patent Office of People's Republic of China issues translations of PCT applications having entered into the national phase in China (CN)

Publication numbers fall within the normal A-document number series, e.g. 1217631, the application number carries digit "8" behind the year, e.g. 98800002. For distinguishing these documents from the normal CN-A series, we will introduce a kind-code T.

We plan to include these documents from week 40/1999 onwards.
