code meaning

At any time within twelve months after sealing of a patent, any person interested who did not oppose the grant of the patent may apply for an order revoking the patent. Grounds of revocation are: obtaining; prior publication/claiming/use; obviousness; not an invention; insufficiency; and for convention applications, not made in time. The applicant for revocation must file a statement setting out his interest, full details of the case on which he relies and the relief sought. The patentee must file a counter-statement setting out his response. Failure to file a counterstatement leads to the patentee's case being treated as undefended. In the event that the application is withdrawn there is no further action after the withdrawal has been advertised in the Official Gazette.
