code meaning

At any time within twelve months after sealing of a patent, any person who did not oppose the grant of the patent may apply for an order revoking the patent. The grounds for revocation are: obtaining; prior publication/claiming/use; obviousness; not an invention; insufficiency; and for convention applications, the application not made in time. The applicant for revocation must file a statement setting out his interest, full details of the case on which he relies and the relief sought. The patentee must file a counterstatement setting out his response. Failure to file a counterstatement leads to the patentee's case being treated as undefended. The application is heard before the comptroller and there is an appeal from any decision to the Patents Appeal Tribunal, and then to the Court of Appeal. If application for revocation refused, the patent remains granted.
