code meaning

A person may seek from a proprietor of a patent a written acknowledgement of a claimed declaration that an act or proposed act will not constitute infringement of the proprietor's patent. Should the proprietor refuse or fail to give such an acknowledgement then the person may apply to the comptroller for a declaration that the act would not constitute infringement. With the application the person must file a statement setting out the facts and the relief sought. The statement is copied to the proprietor who may file a counterstatement setting out the grounds on which he contests the application. Evidence may then be filed by both sides. The decision of the comptroller is advertised in the Official Gazette and it may be that the application is only granted in part.
